But I guess that's not really "moral"? Well, it's good to be consistent! If you want to do the same as I did and count the dots, the following image is a good place to start: A few other things that can be fun are calculating the area, the perimeter or the distance between the different dots. If you want to give a try to the game yourself, just get to the "save" tab (located in the top-right corner). As you will see, it's fairly easy to play, just as you'll be creating a new account and just getting started. "Create your new account" button. But there's a lot more than that! If you want to give a try to the app, you'll have to "login" before you can really play! To login, just press "Login" in the top-right corner. You'll be redirected to your Google Play page, but don't forget to use the correct email, because it's the one you've used before. Then you'll be redirected back to the main page of the app. It's very simple to play, and the UI is very nice and clean! You can play in a sandbox, which means you have to worry about the progress of the game, but you'll have a limited time to complete the current level before being out of the game. At the end of a sandbox, the progress will be saved to your account and you'll be able to continue your game. And
