Key Macro is a powerful software for speeding up your computer's working. The program can be easily used to search and replace.Q: Spring Boot: No qualifying bean of type 'javax.sql.DataSource' available: Qualified bean name 'dataSource' I am developing a spring boot application. When I am deploying my application, I am getting below mentioned error. I don't have any idea why it's coming like this. 2018-08-23 23:03:30.988 INFO 9696 --- [main] com.example.App : Starting App on dfq@domain with PID 9696 (C:\Development\apache-tomcat-9.0.37\apache-tomcat-9.0.37\bin\tomcat.exe) 2018-08-23 23:03:30.994 INFO 9696 --- [main] com.example.App : No qualifying bean of type 'javax.sql.DataSource' available: The main goal of the application is fetching data from different databases and storing it into one table, and displaying it to the user. A: Looks like you are not using a data source. It will be better if you make use of the Spring DataSourceAutoConfiguration and use @Configuration annotated classes to configure your data source. You can add Spring Data configuration classes into your application.properties/application.yml file as follows: spring.jpa.hibernate.naming.physical-strategy=org.hibernate.boot.model.naming.PhysicalNamingStrategyStandardImpl spring.datasource.platform.class: org.h2.jdbcx.JdbcDataSource spring.datasource.driverClassName: org.h2.Driver You can use the following link to get a more information about that: 77a5ca646e
